

Safety Information

>All electrical work must be undertaken by a qualified contractor to ensure compliance with latest edition BS 7671 and IEE/IET wiring regulations.

> Before installing an LED IP20 Surface Mount Escape Route or doing any maintenance, ensure power supply is turned off at the circuit breaker or fuse box.

> This product is designed for permanent connection to fixed wiring; the circuit should be protected with the appropriate MCB or fuse.

Environment

> Please DO NOT dispose of electrical items or packaging as unsorted waste. Use the recycling facilities provided by your local authorities.

LED IP20 SURFACE MOUNT ESCAPE ROUTE NET-44-10-66

KEY DATA

Light Source:	LED 
Size (mm)	180 x 110 x 50mm
Power	2.2W
Luminous Flux	130lm
Colour Temperature	6500K
Housing Material	Polycarbonate
IP Rating	IP20
Manufacturer	DPPUL

SUPPLY/EARTH CLASS

Installation procedure: Carefully read the installation instructions and ensure the mains supply is isolated before installation. Please follow the safety information overleaf before carrying out any installation. Please retain this leaflet for future reference.

LED IP20 Surface Mount Escape Route Installation:

Instructions for use:

Step 1: Remove the screw, then push the cover sideways.

Step 2: Drill through the circular cable entry hole.

Step 3: Fix the base using appropriate fixings.

Step 4: Connect the battery and connect to the power.

1. The light is suitable for indoor use only.

2. When it is connected to the AC power, the battery is charged and working indicator is illuminated.

3. To test the light, please press the 'TEST' button. The light will then work from the battery supply; when the 'TEST' button is released, the light works in normal working mode.

Step 5: Close the cover, matching the position of the arrow.

Step 6: Tighten the screw.

4. In order to ensure the emergency light works normally, it is required to connect the light to the specified power line.

Emergency Test Record:

- 1 Ensure the load is connected
- 2 Connect the battery
- 3 Switch on the Unswitched Supply - Check the charge LED illuminates
- 4 Switch on the Maintained Supply - Check the LEDs illuminate as normal
- 5 Switch off the Maintained Supply
- 6 Switch off the Unswitched Supply - Check the charge LED extinguishes and luminaire functions in emergency mode
