

# Gripple Suspension Kit Assembly

## Instructions for LED Panels

NET-46-16-02

### Gripple Suspension Kit Components

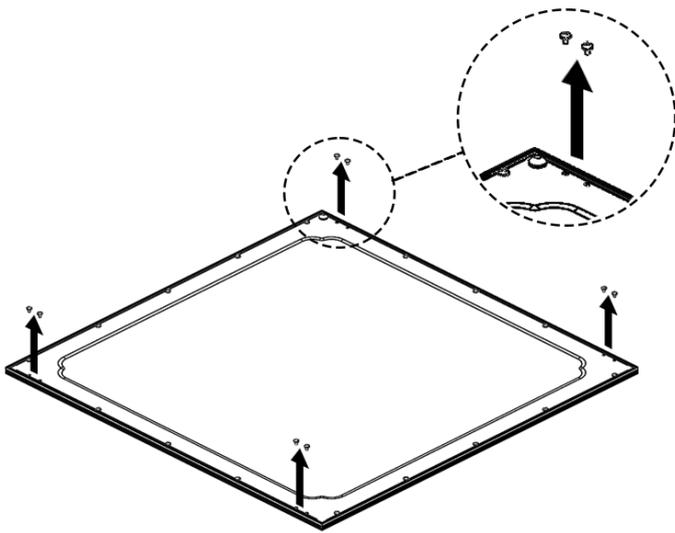

Step 1: Feed Anchor Wire into the Metal Clasp

Step 2: Feed Anchor Wire through the Suspension Wire hoop.

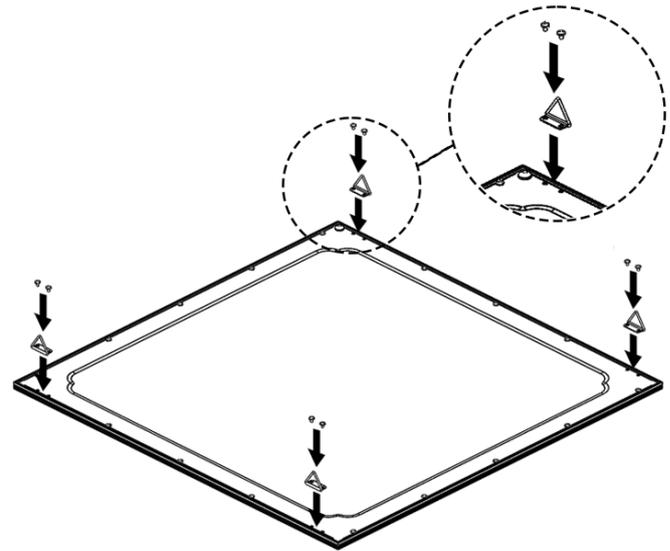

Step 3: Feed Anchor Wire back into Metal Clasp. Pull upwards on wire to adjust height.

Complete Assembly. Repeat process for second cable.

Step 4: Remove 2x rear securing screws from each corner.

Step 5: Align brackets with the corner fixing holes, then attached the 2x securing screws in each corner. Use longer securing screws supplied with kit.

Step 6: Attach the Anchor Wires to the ceiling with suitable rawl plugs and fixing screws.

Step 7: Attach the Suspension Wires to the corner brackets. Adjust the suspension height if required.

To release the suspension wire from the metal clasp, insert the release pin into the release pin hole, then feed the wire out the metal clasp until the correct height it achieved.
