light your moment

H2 Sense

It makes **sense**

With a built in sensor gain fast payback
keeping lights off that people leave on

H2 Sense

PIR downlight

H2 Sense	White PIR Bezel	White Non-PIR Bezel	Black PIR Bezel	Black Non-PIR Bezel
DLSENSE	DLSENWBEZP	DLSENWBEZ	DLSENBBEZP	DLSENBBEZ

Built in PIR sensor

The PIR sensor built into the bezel of the H2 Sense makes this the perfect downlight for money and energy savings. There is no need for an unsightly separate PIR sensor.

Ø68-72 mm

PIR settings

You can adjust the time, sensitivity and lux levels easily from the back of the bezel.

Quick & Easy installation

Without the need for an additional PIR sensor save time and money on installation.

Save time
on installing a separate PIR sensor

Save money
on buying a separate PIR sensor

200W load

Connect up to 200W of other lighting to your H2 Sense so your H2 Sense triggers all of the lights in the room. You can also connect non-lighting products such as bathroom fans to turn on and off with the H2 Sense as long as they are under 200W.

CCT switchable

Easily change the colour temperature using the switch under the bezel.

2700K   **3000K**   **4000K**

Lumen output

H2 Sense has a high output of
3000K : 650lm
4000K : 675lm

675lm

IP65

IP65 from the front and IP20 from the back making it ideal for bathrooms.
