LIGHTING

QUICK & EASY INSTALLATION

The plug and play through wire install method allows great flexibility. The maximum distance between products using fly leads is 330mm. If you require further space between products, Volta is supplied with two additional connectors, male and female, to allow the cabling between products to be extended. Additional cables not supplied.

ADJUSTABLE BRACKETS

Fully flexible first-fix bracket. Slides at each end of the product and can be attached anywhere.

BEAM ANGLES

With three beam angles to choose from, Volta allows great flexibility, whether you are adding grandeur to buildings, highlighting intricate architectural features or drawing guests to an entrance.

60° beam

30° beam

25x35° beam

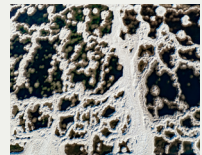

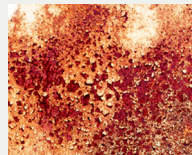

SUITABLE FOR COASTAL ENVIRONMENT

Corrosion resistant

Keeps product looking great for its entire lifespan.

Salt mist protection

Protected in coastal areas.
