Designed to Deliver

Ansell Lighting design and manufacture internal and external lighting solutions for customers across the whole spectrum of the public and private sectors, with quality and sustainability at the heart of our operations.

Established in 1992, we have grown to become a global operator with bases in Warrington and Belfast and state of the art showrooms in Belfast, Warrington, Madrid and Dublin, supplying to more than 26 countries.

Ansell Lighting is a byword for innovation in lighting design and we have won multiple awards for our energy-efficient luminaires and industry-leading lighting control system, OCTO.

Next Day Delivery

We offer next day delivery and same day collection on orders placed before 4pm.

LIA Accredited

Our products are tested in-house to maintain the highest standards of quality and reliability.

After Sales Support

Benefit from a highly knowledgeable technical team, ready to offer advice and information on our complete product range, pre and post installation.

Sustainability

Ansell Lighting is committed to achieving Net Zero, leading the way since our first low-energy LED production in 2004. Our OCTO smart lighting range is a key part of this mission, helping to minimise carbon and waste footprints. We partner with sustainable manufacturers, ensure compliance with environmental laws, and prioritise waste neutrality in our UK assembly lines. From recyclable packaging to recycling spare parts, we're focused on reducing our impact every step of the way.

The Complete Connected Solution

OCTO™

Introducing OCTO, the next generation of smart lighting solutions designed to revolutionise the way you experience light.

Combining cutting-edge technology with seamless control, OCTO transforms the efficiency and ambiance of both commercial and residential spaces.

With advanced protocols, data-driven insights, and unparalleled service, we deliver tailored connectivity solutions that meet your unique needs.

Our experts are with you every step of the way, ensuring your project exceeds expectations, every time. OCTO isn't just a brand - it's a new standard in connected living, optimising lighting for any environment and elevating your experience to new heights.

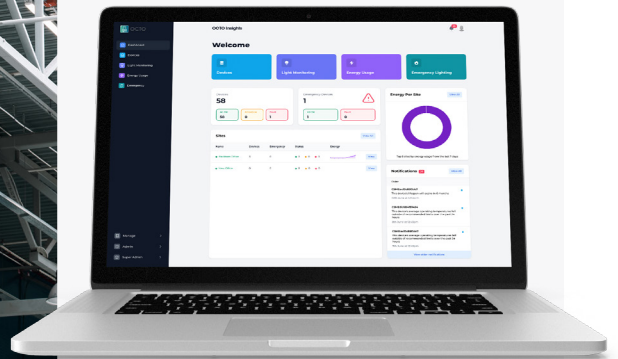

Read on to find out how OCTO can revolutionise your commercial and residential lighting projects...

Commercial

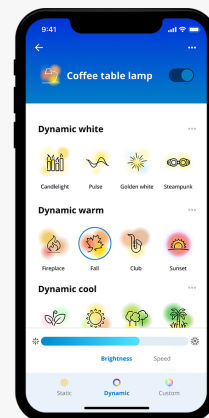

Let OCTO transform your workspace with intelligent, energy-efficient lighting systems that reduce operational costs, enhance safety and optimises productivity.

Residential

Elevate each area of your home with personalised, intuitive lighting that adapts to your lifestyle, creating the perfect ambiance while offering convenience, security and energy savings.

Transform your spaces with OCTO

The Ultimate Connected System

Step into a world of intelligent illumination with OCTO. Encounter uninterrupted brilliance through predictive maintenance, achieve energy efficiency and ensure safety with real-time emergency reporting. Personalise your ambiance, prioritise wellbeing, enhance security, and enjoy accessibility for all. OCTO is your gateway to a brighter, smarter future.

Check out some of the benefits...

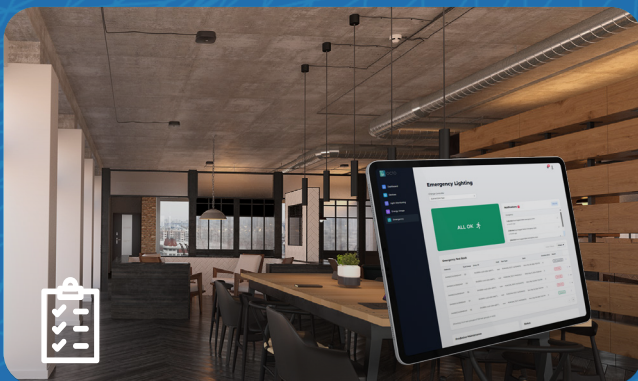

Predictive Maintenance

Help alleviate the increasing costs associated with lighting maintenance.

Energy Saving

Unlock the insights from raw energy usage data and transform it into actionable insight.

Emergency Reporting

Ensure compliance with legal safety obligations by guaranteeing your emergency lights are fully operational and always in top condition.

Automation

Deliver versatile solutions applicable across various settings, allowing users to select the most suitable configuration for their needs, blending functionality with ease of use.

Health and Welfare

Luminaires, beyond their primary function of providing illumination, possess the capacity to contribute significantly to holistic well-being, encompassing aspects such as mood enhancement, circadian rhythm regulation, and even physiological effects on individuals within a space.

Security and Safety

Illuminate exit routes and employ monitoring systems to enhance security and safety measures.

Accessible Anywhere

Remote access for controlling and monitoring lighting is crucial for efficient management, offering convenience and flexibility in overseeing lighting systems from anywhere at any time.

Multi User

Facilitate easy and efficient management of lighting by multiple users simultaneously.

Data

Unlock new possibilities with OCTO's lighting solutions, where every light not only illuminates but also gathers valuable data to enhance efficiency and drive smarter decisions.

Support

With OCTO, you're never alone - our dedicated support team is with you at every step, ensuring your project is seamlessly executed from concept to completion. What's more, we offer regular CPD sessions covering all of our smart offering.

Ansell offer regular CPD sessions to train you on smart lighting.

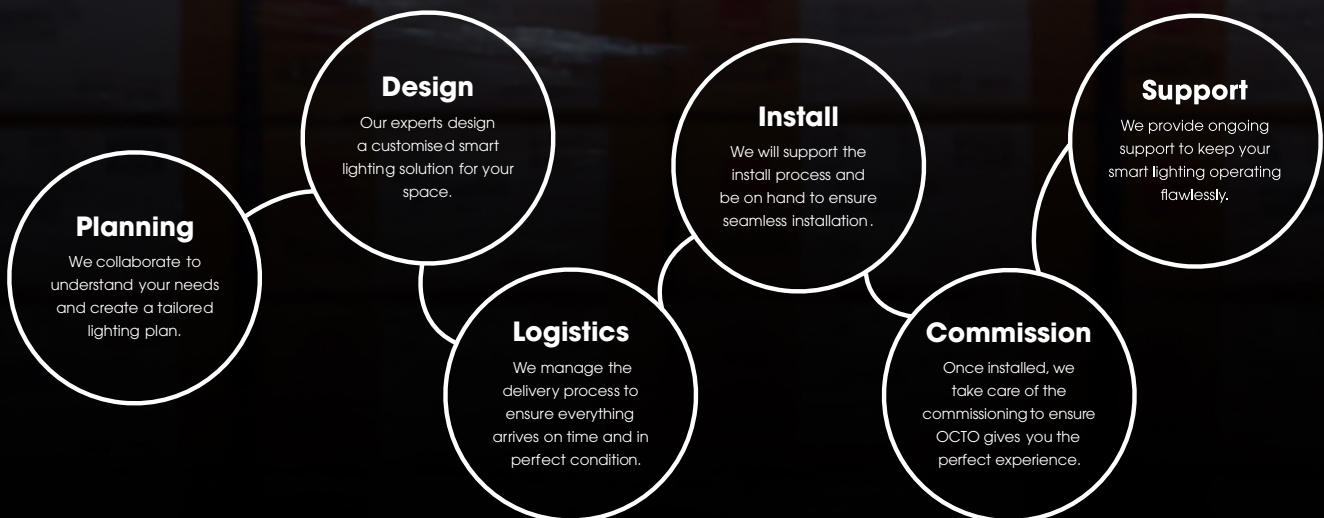

A perfect partnership

and why OCTO is so important

Our OCTO team are with you every step of the way, from envisioning your perfect connected lighting solution to bringing it to life and beyond. Our dedicated team will collaborate with you to design a tailored system that meets your unique needs, support with a seamless installation process and provide ongoing support to ensure your lighting continues to perform at its best.

With our experts by your side, you can trust that your journey to smarter, more efficient lighting will be smooth, successful and fully supported from start to finish.

Your OCTO Journey with Ansell

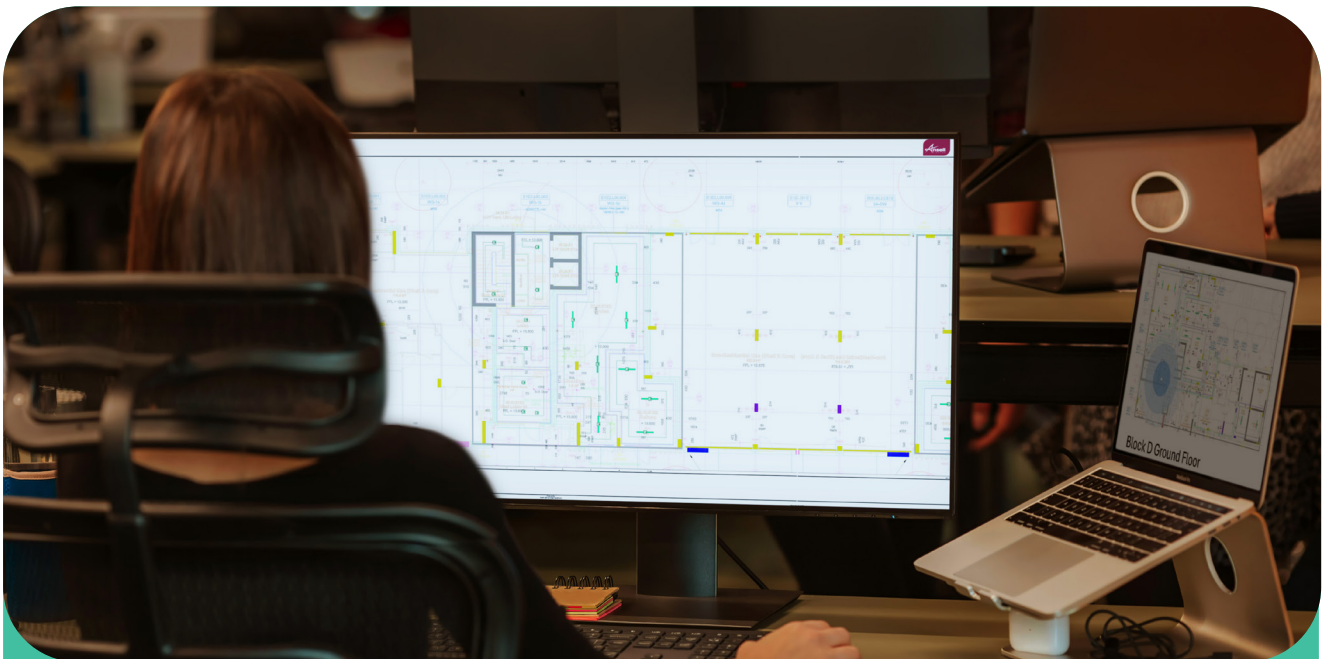

Design Service

We have worked alongside designers on some of the most prestigious installations in the world and are a trusted partner for specifiers, architects and contractors.

Our bespoke in-house lighting design service is available and free of charge for projects of all sizes and covers everything from planning, layout, payback calculations and full 3D rendering, to OCTO controls and network design and post installation support.

We utilise the latest in 3D design engineering technology and photometric analysis software to ensure fast turnarounds come as standard. As does knowledge, creativity and a genuine commitment to deliver on the brief.

All of our Lighting Designers are fully LIA qualified and bring a diverse range of expertise to a wide variety of projects, ensuring the highest of design standards.

Commercial Solutions

The Ultimate Professional Control System Perfect for Commercial Solutions...

OCTO's commercial solutions are designed to transform your business environment with smart lighting that enhances efficiency, reduces energy costs and elevates the ambiance of any space.

Our advanced systems offer seamless control, customisable to your specific needs, while providing valuable insights through data analytics. From initial assessment to final installation, OCTO's expert team ensures a smooth, tailored experience, delivering lighting solutions that not only meet, but exceed your commercial objectives.

Read on to find out how OCTO can revolutionise your commercial lighting...

OCTO's scalable solutions grow with your needs, effortlessly adapting from small installations to large, complex projects.

Why consider OCTO?

Imagine a workspace where lighting adapts to your every need - where efficiency, comfort and innovation seamlessly converge. Smart, intelligent and connected lighting isn't just about illuminating your space; it's about transforming it. With cutting-edge technology, these systems not only reduce energy costs but also enhance productivity, safety and sustainability, creating an environment that's as dynamic as your business. Embrace the future of lighting and discover how OCTO can elevate your commercial and industrial spaces to new heights.

Energy Efficiency and Cost Savings

OCTO optimises lighting with sensors and adaptive controls, reducing energy use by adjusting to real-time conditions. This lowers energy bills and operational costs through remote monitoring and predictive maintenance.

Enhanced Workplace Productivity and Comfort

OCTO offers customisable lighting that adapts to specific needs, improving worker comfort and productivity. Automatically adjust lighting for tasks like presentations or high-traffic areas, with voice control via the OCTO Gateway.

Improved Safety and Security

OCTO enhances security with motion-activated lighting and tracks activations for added transparency. It automates emergency lighting tests and monitors device health, ensuring compliance and safety.

Scalability and Flexibility

OCTO's modular design easily scales to meet changing needs, ideal for dynamic spaces. Manage large-scale lighting remotely from a central dashboard, perfect for multi-site operations.

Sustainability and Environmental Impact

OCTO reduces your carbon footprint by minimising energy consumption, helping you meet green building standards like LEED with advanced energy management.

Data-Driven Insights

OCTO provides analytics on energy use, space management, and predictive maintenance, enabling informed decisions to optimise operations and extend system lifespan.

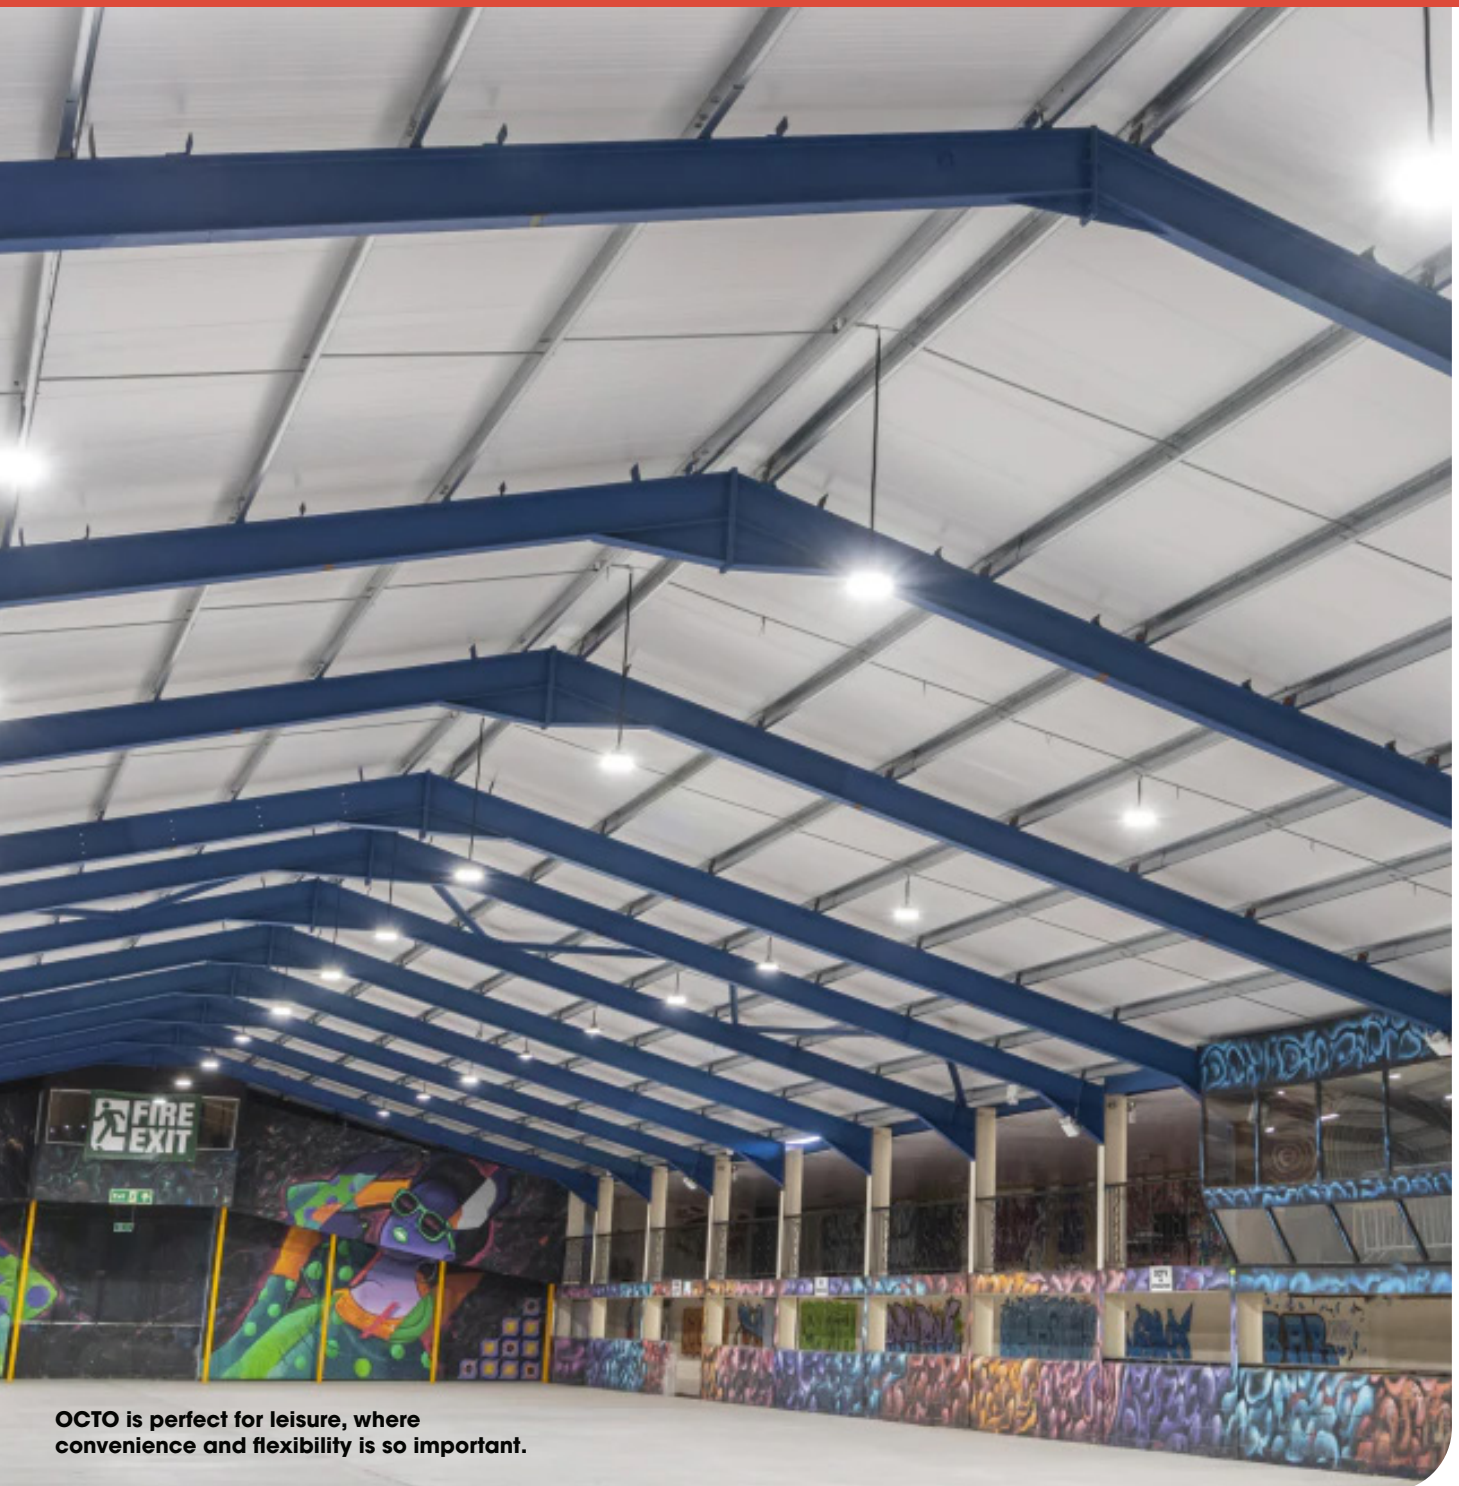

Enhanced Aesthetic and Branding Opportunities

Create dynamic lighting effects with OCTO to enhance the aesthetic appeal and branding of your space, perfect for retail and public environments where ambiance matters.

The OCTO Ecosystem

At the heart of OCTO is the innovative Ansell products that bring your vision to life. From quality luminaires Ansell has delivered for years, to advanced sensors and switches that respond intuitively to your environment, every component is designed to work in harmony.

Seamlessly connected through mobile apps and gateways, these technologies empower you to control, customise and optimise your lighting. Together, they create a lighting ecosystem that is not just smart, but truly transformative - unlocking endless possibilities for a brighter, more efficient future.

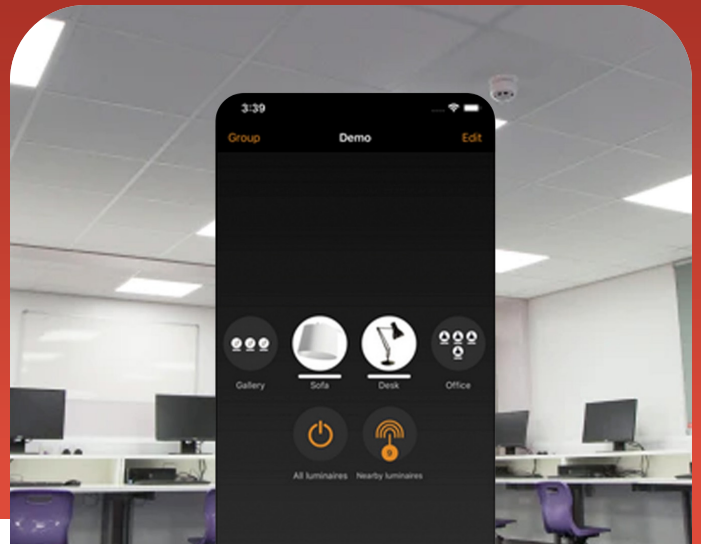

OCTO is perfect for leisure, where convenience and flexibility is so important.

Luminaires

Our impressive range of luminaires offers the ability to tailor lighting solutions that enhance productivity, reduce energy costs, and create the perfect ambiance for any business environment.

View our range of luminaires online

App

Control your lighting effortlessly from anywhere with an intuitive app, putting the power of customisation at your fingertips.

Switches and Sensors

The sensors and switches in the OCTO smart lighting ecosystem are designed to seamlessly complement and enhance your lighting experience. Allowing for precise control and automation that adapts to your daily routines and environmental conditions. Motion sensors ensure lights are only on when needed, saving energy and reducing costs, while smart switches offer effortless, intuitive control at your fingertips or via voice commands.

Gateway

Connect and expand your lighting network with the OCTO Gateway, a unique proprietary device which allows seamless integration with OCTO Insight, the cloud dashboard for OCTO. It also connects Casambi to Alexa, adding voice control easily.

Managing your emergency lighting on large scale installations becomes a dream with OCTO Insight.

OCTO Insight - Data Dashboard

Gain real-time insights from your lighting systems with ease using OCTO Insight. Monitor your network of emergency lighting and get live notifications of any failures or devices that need attention. [Read more on the next page.](#)

What protocols does OCTO use?

OCTO is a seamlessly integratable solution, designed to prioritise the best-fit technology for each unique project. While others focus on protocol, OCTO takes a solution-first approach, ensuring that the technology serves your needs - not the other way around.

Powered by a backbone of robust platforms like Casambi and Tridonic, and enhanced by Ansell's proprietary innovations, OCTO is perfectly positioned to deliver across a wide range of applications.

Explore the sectors we serve later in this brochure to see how OCTO can elevate your next project.

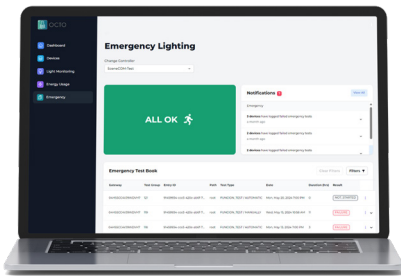

We will help you design the solution which works for you, using the best protocols for your requirements.

CASAMBI **TRIDONIC**

A closer look at OCTO Insight

Octo Insight is your dynamic analytics tool which will enable you to monitor, manage and make decisions based on the data and notifications you receive. Keep your buildings safe and compliant with the emergency monitoring, predict when devices are at end of life and save money by understanding the energy consumption and compare across sites.

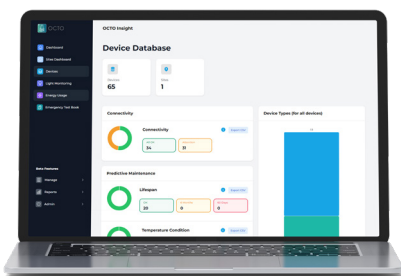

Emergency Lighting

Ensuring the safety and functionality of emergency lighting systems is essential, regular testing and maintenance is a legal obligation. This can be expensive, time consuming and imperfect when done manually. With OCTO Insight, you have all of your emergency test reports at the click of a button, secure in the cloud. You'll receive live notifications when there are issues and you can plan maintenance more effectively with the predictive maintenance data.

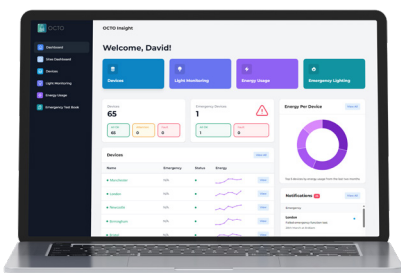

Energy Monitoring

OCTO Insight facilitates a shift from passive to proactive energy management, allowing organisations to seamlessly integrate real-time data and actionable insight with sustainability goals.

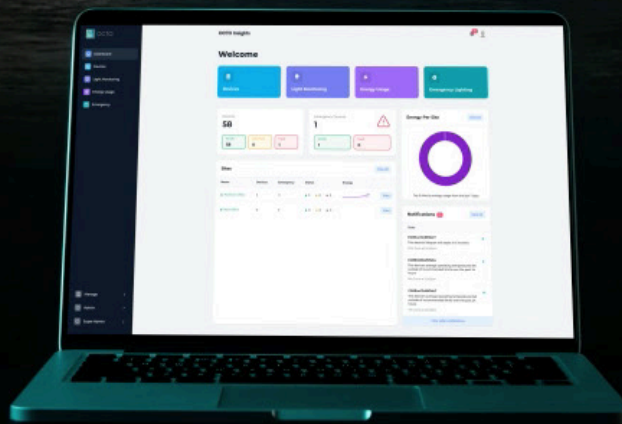

Device Performance

Delve into the device database UI, gaining insight into total sites, buildings, areas, groups and devices. Uncover the predictive maintenance capabilities of OCTO Insight, ensuring a prolonged device lifespan and operational efficiency.

Light Monitoring

Explore the light monitoring dashboard, gaining insight into luminaires, connectivity, lumen output failure and burning hours. The dashboard provides a site overview with simplified reports, ensuring fast insight into energy utilisation.

Illuminating Intimacy

En La Parra Restaurant

En La Parra, based in Salamanca, Spain, decided to expand and improve its facilities in order to debut its recent award: the Michelin Star 2022. Placing the customer experience at the heart of their concept is one of the many reasons for implementing a new lighting system, along with our intelligent control system, OCTO.

Prism Pro Mini Downlight

The Challenge

En La Parra faced the challenge of outdated lighting, prompting the need for a comprehensive system upgrade to enhance both aesthetic and functional aspects of their restaurant ambiance.

The Solution

Faced with outdated lighting, the challenge was to revamp the entire system for a modern and adaptable ambiance. The solution involved implementing advanced technology, ensuring a transformative upgrade that harmonised both aesthetic and functional elements.

The Result

The results were transformative. Visual comfort and dynamic lighting scenarios enhanced the gastronomic journey. Energy efficient luminaires like the **Boa LED Strip** and **Prism Pro family** contributed to significant savings.

Bright Bays the Smart Way Ansell Lighting Warehouse

Ansell Lighting recently upgraded its warehouse in Warrington, Cheshire, to enhance operations and sustainability. Recognising the need for improved lighting, Ansell aimed to boost energy efficiency, flexibility, and safety. By installing advanced luminaires and integrating the OCTO smart control system, the company ensured optimal lighting conditions. This upgrade reflects Ansell's commitment to innovative solutions that support their growing business needs while prioritising environmental responsibility and operational excellence.

The Result

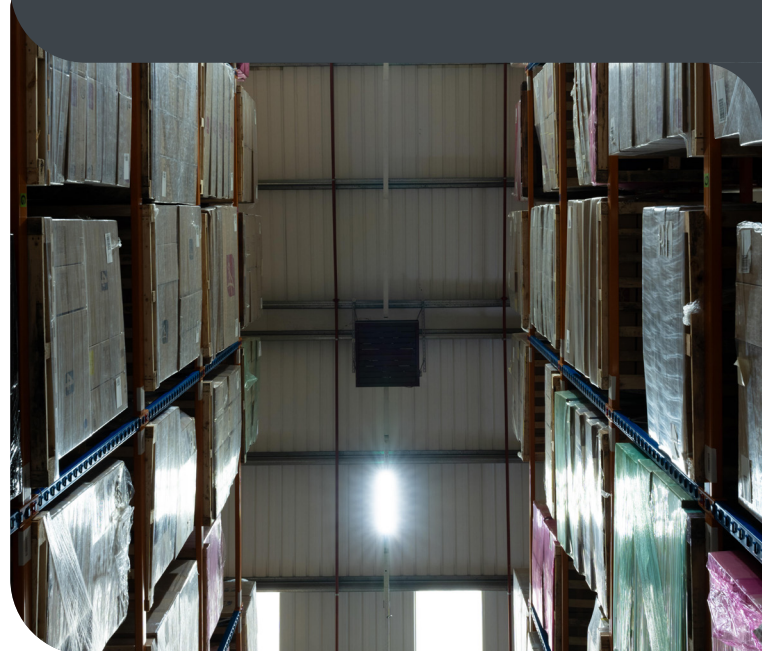

The new lighting system reduced energy consumption and maintenance costs, boosting operational efficiency and safety. OCTO Insight enabled predictive maintenance and better warehouse management. The upgrade saved over 9 tonnes of CO₂e annually, with a two-year payback. Improved lighting conditions enhanced visual comfort and safety, showcasing the benefits of advanced lighting solutions.

The Challenge

Ansell Lighting's warehouse in Warrington had an outdated lighting system, leading to high costs and safety concerns. The system couldn't meet the growing operational needs, prompting the need for a lighting upgrade to improve sustainability, flexibility, energy efficiency and reduce maintenance, ensuring a safer and more efficient workspace.

The Solution

Ansell Lighting upgraded the warehouse with Z LED Performance and Z LED Linear Opti-X luminaires. The Lighting Design team's strategic planning ensured optimal light levels. The OCTO smart lighting system allowed for precise control, enhancing flexibility and efficiency. These improvements addressed varying aisle sizes and ceiling heights, providing a comprehensive lighting solution.

Residential Solutions

The Perfect Home Smart Lighting Solution...

Imagine a home where your lighting adapts to your lifestyle, enhancing every moment with perfect ambiance, effortless control and intelligent energy use. OCTO transforms your living space into a sanctuary of comfort, security, and creativity, all while seamlessly integrating with your daily routine.

From setting the mood with a single touch to saving energy without sacrificing style, these advanced systems bring a new level of luxury and convenience to your home.

Step into the future of living and discover how our OCTO smart lighting can elevate your home to new heights of comfort and sophistication

Why consider OCTO for your home?

Imagine a home where your lighting adapts to your lifestyle, enhancing every moment with perfect ambiance, effortless control and intelligent energy use. OCTO transforms your living space into a sanctuary of comfort, security, and creativity, all while seamlessly integrating with your daily routine. From setting the mood with a single touch to saving energy without sacrificing style, these advanced systems bring a new level of luxury and convenience to your home. Step into the future of living and discover how our OCTO smart lighting can elevate your home to new heights of comfort and sophistication.

Enhanced Convenience and Control

Effortless Control:

OCTO allows you to control your home's lighting from anywhere using your smartphone, tablet, or voice commands. Whether you're at home or away, you can adjust the lights to suit your needs with just a tap or a voice command.

Automation:

Set schedules or use sensors to automate your lighting, so it adjusts to your routine without any manual effort. Lights can automatically turn on as you arrive home, dim in the evening, or switch off when you leave a room, making daily life easier and more intuitive.

Energy Efficiency and Cost Savings

Optimised Energy Use:

You can significantly reduce energy consumption by ensuring lights are only on when needed and at the right brightness levels, OCTO can automate this!

Eco-Friendly:

By minimising unnecessary energy use, OCTO contributes to a more sustainable lifestyle, reducing your household's carbon footprint.

Improved Comfort and Ambiance

Personalised Lighting:

Customise the ambiance of your home with ease. Create the perfect mood for any occasion - whether it's a cosy movie night, a lively dinner party, or a relaxing evening - by adjusting colour temperatures and brightness levels to your liking.

Dynamic Scenes:

Pre-set lighting scenes can transform your home's atmosphere at the touch of a button, seamlessly shifting from bright, energising light during the day to warm, soothing tones at night.

Connected by

Increased Home Security

Enhanced Security Features:

Enhance home security by integrating with other smart home devices. Set your lights to turn on or off in response to motion, or simulate occupancy when you're away by scheduling lights to turn on and off, deterring potential intruders.

Remote Monitoring:

With remote access, you can monitor and control your home's lighting even when you're not there, giving you peace of mind wherever you are.

Health and Wellbeing

Circadian Rhythm Support:

OCTO can mimic natural daylight patterns, supporting your body's circadian rhythms. This can help improve sleep quality, mood and overall wellbeing by providing the right type of light at the right time of day.

Reduced Eye Strain:

Adjustable brightness and colour temperature options can reduce eye strain, making it easier to relax, focus, or unwind depending on your activities.

Fun and Creativity

Creative Expression:

OCTO gives you the tools to express your personal style and creativity. Experiment with different colours, themes and lighting effects to make your home uniquely yours, turning any space into a canvas for your imagination.

Interactive Experiences:

Integrate your lighting with other smart devices for interactive experiences, such as syncing lights with music or movies to create an immersive entertainment environment.

Key Features

At the core of your OCTO home lighting experience are the innovative products that make it all possible. From sleek, energy-efficient luminaires that offer customisable brightness and colour, to intuitive sensors and smart switches that respond effortlessly to your presence, every element is designed to enhance your lifestyle. Control it all with our user-friendly app or simple voice commands! Let's take a closer look at some of the features of OCTO for the home...

Connected by

WIZ

Voice Control

Complete control over your lighting hands free with your smart speaker.

Schedules

Customise your lighting experience effortlessly with scheduled automation. Tailor your lights to fit your lifestyle, enhancing convenience and energy efficiency for a smarter, more comfortable home.

Integrations

Experience seamless integration with other smart home devices for a harmonious living environment. OCTO effortlessly synchronises with various smart technologies, ensuring a cohesive and interconnected home experience.

Circadian Rhythm

Enhance your wellbeing with circadian rhythm support. Mimic the natural light of the sun for optimal health and sleep patterns, promoting a balanced lifestyle and rejuvenating rest.

Key Features

Connected by

WIZ

Wiz is the chosen technology of Ansell's residential offering, it's smart lighting and other connected solutions are a perfect fit for your home environment. It seamlessly integrates with all the technologies you'd expect such as Google, Alexa and IFTTT

The WIZ app is simple, intuitive and flexible - making the perfect solution to turn your home into a smart home!

Preset Light Modes

With 8 different preset light modes to choose from quickly selecting the type of light depending on your mood or what you're doing has never been easier.

OCTO

Transform your kitchen with OCTO's smart LED lighting for ultimate control and ambiance.

Residential Radiance Modern Smart Home

Experience the revolution of smart lighting in the modern home with OCTO. Discover how one homeowner transformed their living space, leveraging OCTO's innovative solutions for complete control and unmatched convenience.

The Challenge

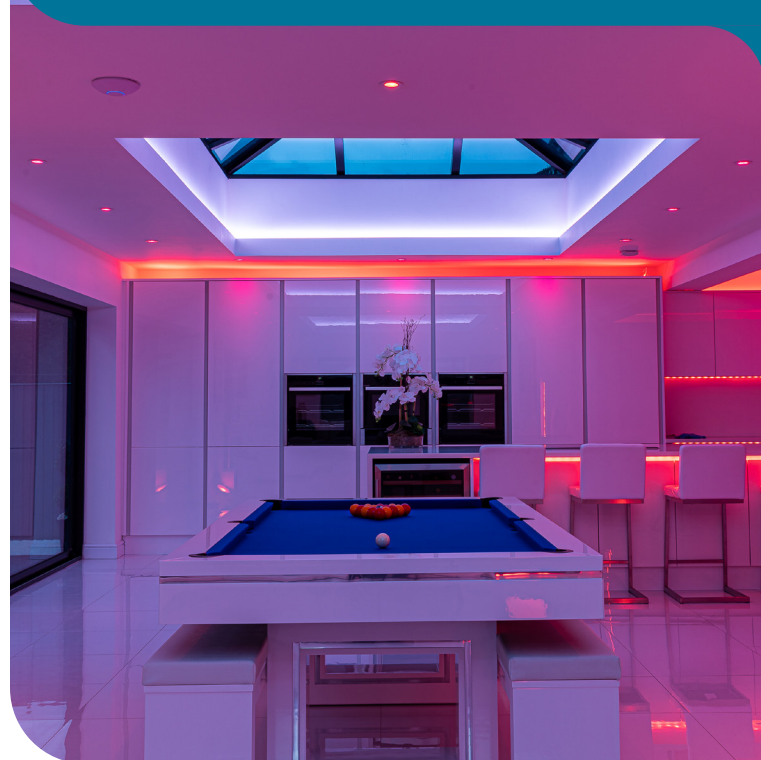

In today's rapidly evolving residential landscape, many homes lack the basic functionality of smart lighting, missing out on the transformative benefits it offers. This case study delves into the journey of a homeowner who sought to enhance their living environment with OCTO's smart lighting system.

The Solution

With OCTO's comprehensive ecosystem of products, the homeowner implemented a tailored solution for their living space. By utilising OCTO's Kraitt LED Strip, Cobra LED Strip, Tandem Bi-Directional wall lights, and Twistlock downlights, they gained precise control over their lighting, creating captivating environments for various activities.

The Result

The integration of OCTO's smart lighting system resulted in a truly magical transformation of the living space. The homeowner could now set customised lighting scenes and animations, optimising energy usage and enhancing ambiance. With OCTO's seamless control and over-the-air updates, they experienced ongoing improvements and post-purchase value, achieving remarkable results in energy savings and overall living comfort.
